

Diver IDentification System (DIDS)

With the DAN Diver IDentification System (DIDS)...

Dive leaders will always know that all divers have returned safely from their dives.

The improved system helps divemasters track their divers at all open-water sites and on charter boats.

- It is supported by DAN Donors and DAN Corporate Donors
- It consists of 1 or 2 DAN Tag Boards, each in red or white with 12 numbered DIDS Tags, capable of tracking up to 24 divers at the same time.

Here's how it works:

Pre-dive, the dive leader assigns each diver an individually numbered DIDS Tag.

Before diving, the diver removes the tag and clips it to his or her BCD.

After the dive, the diver unclips the tag and returns it to the board.

The DID System combined with another diver roll call procedure will help ensure that no diver will be left in the water.
